How to join online

We are using the **Remo** platform. Please register an account:

https://live.remo.co/signup

The same account might be used for any other Remo event (e.g. Meeting C++)

🤗 First, **please be polite and respect each other**. Do not talk out of turn or over other people. Respect our Code of Conduct.

👉 **After being logged in to the platform**, all you need to do is just visiting this page:

https://cppday.italiancpp.org

The C++ Day takes place in 3 "virtual events" you can move through:

- · 📺 Track A
- · 📺 Track B
- · 💬 Hallway Track & Networking

Track A and Track B will only host sessions. Virtual tables will not be available there.

By stepping into either Track A or Track B, you will automatically watch the current (or incoming) live session, **so you don't need to go to YouTube!**

Instead, **Virtual Hallway will host virtual tables for networking all day long**.

Anytime, you can check out the **agenda** on the event page or on the top-right corner:

For your convenience, the agenda of Virtual Hallway includes the information of both the tracks. On the other hand, the agenda of Track A includes only the sessions of track A, and the agenda of Track B includes only the sessions of track B.

💬 How to do Networking

Jump into "Networking" tab during breaks or whenever you just want to come up for air. **This room is always available.** Quick info:

If you are new to Remo, here is a quick starting guide:

· Double click on a table to take a seat there
  You can chat (or talk) with the people seated around your table
  The chat button is at the bottom of the page

· It is perfectly fine to sit at a table and turn off your mic and cam when you are busy

· Click on a number in the "lift" on the left side of the screen to go to another floor

· Drag the floor image to move the view, scroll the mouse wheel to zoom

· Please use a supported browser

· The top bar is part of the event page: you will not see it if you connect directly to Remo

📺 ❓ How to attend sessions and ask questions

Jump into "Track A" or "Track B" to attend the relative session.

When the talk starts, just be sure the video is "played" (should be done automatically).

Feel free to ask any question in the dedicated "Q&A" chat.

🙏 Please give your Feedback!

Visit https://italiancpp.org/feedback anytime to give feedback to **talks** (we have individual 2-question surveys) and to **the event in general**.

Please, this is very important to us!

👩‍💼 Support and Help

Should you have any problem with the conference single page, you can connect to each track directly:

- Track A → https://live.remo.co/e/c-day-2020
- Track B → https://live.remo.co/e/c-day-2020-track-2
- Networking → https://live.remo.co/e/c-day-2020-hallway-track-and-net

Also, all the sessions are available on YouTube (CET timezone)**:**

- 09:00 - 09:15 Welcome Message
- 09:30 - 10:20 Let's make a telegram bot with C++ (Alberto Bignotti)
- 09:30 - 10:20 Our first game using UE4 and C++ (Michele Mischitelli)
- 10:45 - 11:35 Understanding value categories in C++ (Kris van Rens)
- 10:45 - 11:35 Comunicazione real-time con WebRTC in C++ (Yuri Valentini)
- 11:35 - 12:15 NETWORKING
- 12:13 - 13:05 WebAssembly: an overview (Lorenzo Veneri)
- 13:05 - 14:30 LUNCH
- 14:30 - 15:20 Interoperable AI: ONNX e ONNXRuntime in C++ (Arena/Verasani)
- 14:30 - 15:20 TDD is not about testing (Gianluca Padovani)
- 15:30 - 15:45 Closing Message

However, the only way to interact with others and ask questions is staying on Remo.

If you need any assistance, just reach out to the Staff. You can recognize them by the "star" on their icons. In chats, look for the "[++it staff]" name tag.

We are looking forward to meeting you!

The staff of ++it
